

Affluence Small Company Fund Fund Report - January 2018

Fund Commentary

The Australian market took a breather in January, with the ASX 200 Index down 0.4% and the ASX Small Ordinaries Index down 0.5% for the month. The Affluence Small Company Fund decreased by 0.8%, with the Fund now returning 12.0% per annum since inception. The Fund has underperformed its benchmark (ASX Small Ordinaries) since inception, however it has delivered its returns with about half the volatility of the ASX Small Ordinaries.

Our managers had a mixed month in January. The best performing was the Spheria Australian Microcap Fund (up 1.9%) and the Microequities Deep Value Microcap Fund (up 0.6%). The biggest detractor was the Terra Capital Natural Resources Fund

(down 6.4%), however they have had a stellar run over the past year.

At the end of January, the Affluence Small Company Fund held investments in 6 unlisted funds (including the Affluence LIC Fund) representing 96% of the total portfolio, and the balance 4% cash.

We have identified a number of other outstanding small cap managers that we would like to add to the portfolio in the coming months. In order to make these additional investments, we are considering undertaking a small capital raising in the Fund early next year. If you are potentially interested in participating, please let us know so we can add you to our priority wait list.

If you'd like further details of the Affluence Small Company Fund portfolio at any time, just email us and we'll provide it to you.

What Makes This Fund Different

Traditional Fund Managers	Affluence - Invest Differently
Follow The Herd: Traditional managers are too scared to fail, so they don't succeed. Most don't outperform the index.	Actively Pursue Out-performance: From our fee structure alignment to our investment methodology, our strategy targets positive returns and low volatility.
Restricted Product Selection: Commonly places clients into their own managed funds or choose from a restricted list of 'approved' funds.	Best Of Breed: We will seek the best fund managers, and combine them in a way which cushions against market corrections.
Traditional Asset Classes: Manage large amounts in traditional asset classes (e.g. ASX200 equities), which minimises chances of excess performance.	Unique Strategies: We prefer managers who operate in specialised markets with less funds under management and a competitive advantage.
High, Fixed Fees: Take fees regardless of performance.	No Fixed Fees: Our fees are 100% performance based.

Investment Strategy

We believe that exposure to Small Company stocks through quality investments across different managers, investment strategies and structures can provide higher risk adjusted returns from this asset class.

The Fund provides access to a diversified portfolio of Small Company Equities unlisted funds and LIC's as selected by Affluence. We aim to outperform the ASX Small Ordinaries Accumulation Index over rolling 3 year periods and to deliver these returns with lower volatility.
