Fund Commentary

The Affluence Investment Fund increased 2.2% in April, while the ASX 200 Index increased by 3.5%. Since commencing six years ago in December 2014, the Fund has returned 8.7% per annum, including 6.7% per annum monthly distributions to investors. This is above our benchmark of 6.8% per annum (inflation plus 5% per annum). In addition, the Fund has performed in line with the ASX 200 Index since inception, and these returns have been delivered with significantly lower volatility than the Index.

Our largest positive contributors included our holding in the CD Private Equity series (CD1, CD2, CD3), the Affluence LIC Fund, and the Terra Capital Natural Resources Fund. The largest negative contributor was our index hedge positions.

There continued to be evidence of a changing in the guard of market leaders in April. Prices for the speculative and high growth stocks that dominated 2020 continued to drift back, while more value orientated cyclical and resource stocks powered ahead. This is positive for our portfolio as we hold a much greater proportion of the later. The world continues to push into uncharted territory, as central banks and governments continue to stimulate economies on an unprecedented basis. Earnings forecasts for companies continue to increase, and market and consumer confidence levels are at record levels.

There is now an almost universal belief that the global economy is going to grow strongly for the next couple of years, with the main argument whether this leads to significant inflation or not. All of this comes at a time when most global equity markets are at or near all time record highs, so it is unclear how much of this recovery is already priced into markets. As always, we are not positioning our portfolio for any one particular scenario, but rather to ensure it is prepared for all scenarios.

At month end, 62% of the portfolio was invested in unlisted funds, 17% in the Affluence LIC Fund, 12% in listed investments, 1% in portfolio hedges and 8% in cash. If you would like to know more about the investment portfolio, including our top holdings and weightings, visit the Affluence Investment Fund page at <https://affluencefunds.com.au/aif/> or the Members area of our website. What Makes This Fund Different

Traditional Fund Managers	vs.	Affluence - Invest Differently
Follow The Herd: Traditional managers are too scared to fail, so they don't succeed. Most don't outperform the index.		Actively Pursue Out-performance: From our fee structure alignment to our investment methodology, our strategy targets positive returns and low volatility.
Restricted Product Selection: Commonly places clients into their own managed funds or choose from a restricted list of 'approved' funds.		Best Of Breed: We will seek the best fund managers, and combine them in a way which cushions against market corrections.
Traditional Asset Classes: Manage large amounts in traditional asset classes (e.g. ASX200 equities), which minimises chances of excess performance.		Unique Strategies: We prefer managers who operate in specialised markets with less funds under management and a competitive advantage.
High, Fixed Fees: Take fees regardless of performance.		No Fixed Fees: Our fees are 100% performance based.

Investment Strategy

We believe that exposure to quality investments across multiple asset classes, managers, geographies and strategies should be an essential part of any well diversified portfolio.

The Fund provides access to a diversified investment portfolio of the best fund managers as selected by Affluence. We aim to provide a distribution yield of approximately 5% pa paid monthly and a total annualised return of at least inflation plus 5% over rolling 3 year periods. We aim to deliver these returns with less volatility than the stock market.
