## Investment Objective

The Fund targets a minimum annualised return of inflation plus 5% over rolling three year periods and a minimum distribution of 5% per annum.

## Investment Strategy

The Fund holds a diversified portfolio and can invest across all asset classes. The portfolio includes over 20 different underlying managers and other investments selected by Affluence. The strategy seeks a balance between maximising returns, delivering regular income and lowering volatility.

## Why Use The Fund?

### Portfolio Use

The Fund is designed to be used as a **Core or Satellite** Component of an investment portfolio for those investors seeking **Capital Growth and Income Distributions** with a **Medium** or longer investment timeframe, at least a **Medium** risk/return profile and needing access to capital **Monthly** or less often.

### Access to Differentiated Strategies

The Fund provides access to a wide range of different investment strategies, through boutique investment managers.

### Access to Closed and Wholesale Funds

A significant number of funds in the portfolio are only available to wholesale investors, or closed to new investors.

## Key Risks

As with all investments, the Fund is subject to risks. Key risks include concentration risk, economic and market risk, legal and regulatory risk, manager and key person risk, liquidity risk, leverage risk and currency risk. We aim, where possible, to actively manage risks. However, some risks are outside our control.

## Fund Commentary\*

The Affluence Investment Fund increased by 0.4% in October. Since commencing over ten years ago in December 2014, the Fund has returned 8.2% per annum, including 6.4% per annum monthly distributions to investors. The Fund has outperformed its passive alternative over most time frames.

October was generally strong for markets, with the ASX Small Ords increasing 1.9% (and continuing its recent outperformance compared to large caps) and global markets up over 2%. The price of gold retreated from its recent highs, and the US Government shutdown continued. There continues to be talk of a bubble in AI stock prices and the level of capex spending, however equity markets continue to be full speed ahead.

Our largest positive contributors included the Pzena Emerging Markets Value Fund, the Northcape Capital Global Emerging Markets Fund and the L1 Capital Long Short Fund. Negative contributors included Duxton Farms (DBF) and the Bronte Capital Amalthea Fund.

At month end, 58% of the portfolio was invested in unlisted funds, 20% in the Affluence LIC Fund, 6% in the Affluence Income Trust, 5% in the Affluence Small Company Fund, 6% in listed investments, 1% in portfolio hedges and 5% in cash. If you would like to know more about the investment portfolio, including our top holdings and weightings, visit the Affluence Investment Fund page at <https://affluencefunds.com.au/aif/> or the Members area of our website. You must be registered as an Affluence Member to view the portfolio.

If you would like to invest with us and get access to a diverse range of Australia's fund managers, including over 20 unlisted funds as well as more than 20 LIC's and other listed entities, visit the fund page on our website. There, you can get information on the Fund, apply online or download the application pack. If you'd like to add to your existing investment in the Fund, you can either complete the one-page form available on our website or use the online facility.

**The cut-off for applications this month is 25th November. Units will be issued effective 1st December.**

# Portfolio Structure

The Affluence Investment Fund is our all-weather fund, bringing together our best ideas across all asset classes. The Fund invests in more than 20 funds managed by some of Australia’s best investment managers. In addition, the Fund gains access to fixed income investments through the Affluence Income Trust, to LICs through the Affluence LIC Fund, and to a differentiated small cap equities strategy through the Affluence Small Company Fund.

## Return on \$100,000 Investment\*

## What We Are Excited About

- 01** Our private credit fixed income investments are providing strong, consistent returns. Our expectation for structurally higher interest rates, and the opportunity in private credit, provide excellent risk adjusted return prospects.
- 02** The Affluence LIC Fund portfolio discount to NTA was approximately 27% at October 2025. This level is significantly higher than usual. A reduction in discounts over time can enhance returns. In addition, valuations for many LIC portfolios are very attractive.
- 03** We hold several small-mid sized ASX listed REITs trading at large discounts to NTA. Most are also paying healthy cash distributions. We believe valuations are bottoming, and REIT prices can increase over time to be much closer to NTA.
- 04** Our equity investments have a small/micro cap bias. Since early 2022, large companies have materially outperformed smaller companies. In recent months, this imbalance has started to mean revert.

## Portfolio Summary

Investments are categorised based on their dominant underlying asset class/strategy (e.g. some Australian equity funds may include some global holdings). Australian Equities and Global Equities comprise both long only and long/short strategies.

### Is the Fund right for you?

We created the Affluence Investment Fund as a vehicle in which we could invest the majority of our wealth for the long term. The Fund is diversified by asset class, investment strategy, manager and geography.

It is managed with the mindset of a family office or endowment fund. It seeks to achieve above average medium and long-term returns while paying monthly distributions and reducing risk using diversification and other strategies.

We believe that to achieve better than average returns, you need to invest differently. We believe that value investing works best in the long run. We believe that being aware of long-term cycles can significantly improve performance. And we believe that success requires a long term focus, which in turn requires patience and discipline.

If you share those beliefs, the Fund may be suitable for you.

### Does it suit your portfolio?

The Fund is designed to be used as a Core or Satellite Component of an investment portfolio for those investors seeking Capital Growth and Income Distributions with a Medium or longer investment timeframe, at least a Medium risk/return profile and needing access to capital Monthly or less often.

The Fund has achieved its returns with lower volatility than the Australian share market, and has historically outperformed the ASX200 when markets fall significantly.

As with all investments, the Fund is subject to risks. The value of an investment will go up and down over time, the Fund's returns will vary, future returns may differ from past returns, and returns are not guaranteed. This means that there is always the chance that you could lose money on an investment in the Fund.

### Why invest with Affluence?

We pride ourselves on the quality of our products and alignment with investors.

We were the first investors in each of our funds. A significant proportion of our own and extended families wealth is invested in Affluence funds.

We charge no fixed management fee for any of our funds. Instead, we charge a performance fee of 12.5% of positive returns<sup>4</sup>. This encourages us to focus on generating strong returns, while managing risk and limiting losses. If our investors do well, we will do well.

We believe managing less money than average provides us with significant advantages. So we don't aim to be the biggest manager. We do aim to be one of the best. We are proud of our performance record to date.
