Investment Objective

The Fund aims to pay a minimum distribution equal to the RBA Cash Rate plus 3% per annum, paid monthly. The Fund also aims to preserve capital over rolling 3 year periods after payment of distributions.

Investment Strategy

The Fund invests predominantly in a highly diversified fixed income portfolio, with a focus on maximising returns with low volatility. The Fund has a flexible investment mandate. This allows us to take advantage of what we believe to be the best risk adjusted investment opportunities within the fixed income asset class at any given time.

Why Use The Fund?

Portfolio Use

The Fund is designed for use as up to a **Core Component** of an investment portfolio for those investors seeking **Income and Capital Preservation** with a **one year** or longer investment timeframe, a **Low** risk/return profile and needing access to capital **Monthly** or less often.

Diversification within Fixed Income

We aim for the portfolio to be highly diversified within the fixed income asset class by sub-sector, underlying manager, investment strategy, credit risk, liquidity, and investment structure.

Access to Wholesale Funds

A significant number of funds in the portfolio are only available to wholesale and institutional investors.

Key Risks

As with all investments, the Fund is subject to risks. If these risks eventuate, they may result in a reduction in the value of your investment in the Fund and/or a reduction or cessation of distributions.

Portfolio Sector Diversification

Asset Class – Fixed Income

Asset class data is estimated on a look through basis based on the most recent data available for each investment.

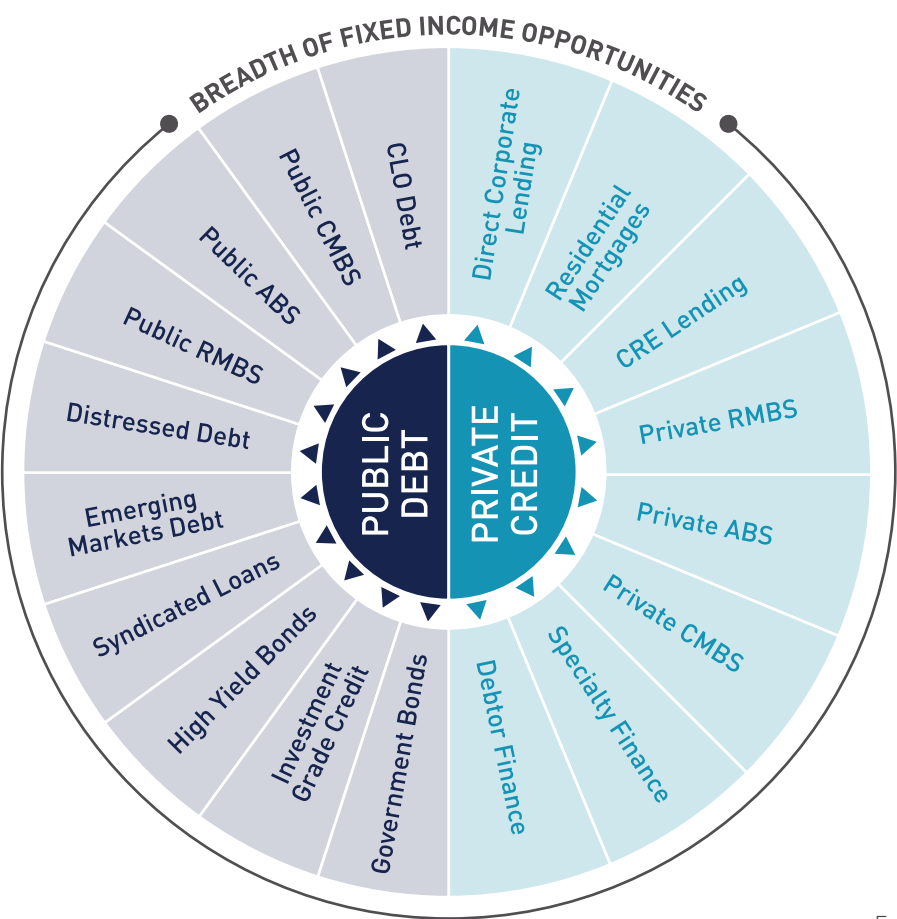

Diversification By Underlying Investment

The Affluence Income Trust currently holds 20 underlying investments, plus cash. Each segment represents an individual investment of the Fund. Each of these investments in turn owns a portfolio of underlying debt investments, providing access to thousands of individual loans.

Wide Investment Mandate

The Affluence Income Trust has a wide investment mandate allowing us to seek the best risk adjusted returns in the fixed income sector at any given time. We believe that over time the most attractive sectors of fixed income will vary, and therefore the portfolio allocation between sub-sectors will need to vary as well. This feature of the fund provides one of the single biggest opportunities to add value through a cycle.
