What is capital growth?

What is capital preservation?

Capital preservation in an investment is an investment in which there is lower volatility in the change of principal value (i.e. change in the unit price) and the risks of capital loss (i.e. devaluation of investment) are actively managed, although capital is not guaranteed so a loss may still be suffered.

What is capital guaranteed?

A capital guaranteed investment is an investment in which the investor's principal is shielded from any loss of value over time.

What is an income distribution?

An income distribution is the periodic payment of income from the Fund's assets to its investors.
